

The silence of an electric, the flexibility of a steam engine and

MORE RESERVE POWER

than any car of its weight in the world

All engineers acknowledge, and have always done so, that the finality of gas engine design must be realized in the six-cylinder motor.

One hundred and fifty of these cars have been allotted to our New York Branch, fifty of which have been delivered during the past six weeks.

WE GUARANTEE DELIVERIES IN TEN DAYS POSITIVELY.

Call at our salesroom or 'phone us and let us make an appointment to give you a demonstration of this wonderful car. We will gladly give you a run under the most unfavorable conditions you may suggest, to show you what this six-cylinder

We are here to SHOW YOU. If we can take you for a trip on Long Island, where sand hills and bad roads are abundant, you will know WHY the six-cylinder car is the best automobile ever built.

What Six Cylinders Mean

MORE POWER. LESS WEIGHT. IS PRACTICALLY A GASOLENE TURBINE.

Has no DEAD CENTRE—no moment of inertia.
No LOSS OF MOMENTUM BETWEEN IMPULSES—requires ONLY
65-POUND FLY WHEEL.

A single cylinder of the same power would require a 1,000-lb. fly wheel, a four-cylinder 90 lbs., while an eight-cylinder will require 150 lbs. Because, contrary to the general supposition, the eight-cylinder with cranks set at right angles is not so well balanced as the six-cylinder with cranks at 120 degrees. The most perfectly balanced motor possible—the ULTIMATE OF GAS ENGINE DESIGN.

Has lighter power impulse and ABSOLUTELY NO VIBRATION, which means LONGER LIFE TO TIRES AND CAR. LESS LIABIL-ITY OF CRANK SHAFT CRYSTALIZING AND BREAKING, because of the ABSENCE of HEAVY POWER IMPULSES or SHOCKS.

GREATER LATITUDE OF SPEED and POWER and CONTROL,

making TRANSMISSION gears almost UNNECESSARY.

LESS WEAR and TEAR on the ENGINE, because each cylinder has less to do. GREATER RESERVE POWER.

Practically a SELF-STARTING MOTOR, for at all times one of the six pistons is in the right position to receive the impulse by throwing on the switch.

All these points can be PROVEN TO YOU to your satisfaction if we can give you a demonstration.
TWENTY-FIVE LEADING FOREIGN MANUFACTURERS ARE

BUILDING six-cylinder cars.

All entries so far for VANDERBILT CUP RACE are for SIX-CYLIN-

The motor boat that made the remarkably fast trip ACROSS THE ATLANTIC OCEAN had SIX-CYLINDER MOTORS.

Don't allow the "year behind" dealer to influence you. INVESTI-GATE THIS CAR FOR YOURSELF.

You do not know the possibilities of an Automobile until you ride in the Six-Cylinder

This is a broad statement, but allow us an opportunity to demonstrate this fact.

"The 75-Mile Car.

Radical improvements in design, complete perfection of every mechanical detail, careful workmanship and tested materials have made the Columbus Electric a model difficult of imitation. In mileage, speed, economy and efficiency it is unequalled.

Stanhope, \$1,600.

Demonstration by appointment. ARCHER & CO., 1597 Broadway.

PRICE WITHOUT EQUIPMENT, \$2,500.

The AEROCAR COMPANY,

PERCY OWEN, General Eastern Sales Mgr. Broadway and Seventy-third St., New York.

THE INCOMPARABLE

THE CAR FOR SERVICE.

TIRE ECONOMY.

Every motorist knows that up-keep of tires is, in the case of most cars, a heavy item of expense. The testimony of all critical observers, including those in the tire trade, is that White cars have far less tire trouble than any other make of touring cars. This great advantage is due partly to the fact that the White starts without jerk or jolt and that changes of speed are effected gradually without any sudden strain on tires and machinery. Another factor reducing tire expense on the White to a fraction of that on other cars is that the White glides along smoothly and absolutely without vibration. In other words, the only jolts to which the tires are subjected are those of the road. As an experienced motorist has expressed it, "The wear on tires

on the White car is all from beneath and none from above."

We have a few early June deliveries for prompt buyers.
